

CASTLE CROPS

Website & Social Media Proposal

Digital Presence Strategy · Prepared 2026

A digital home worthy of the brand

- ◆ Present Castle Crops as a premium, trustworthy export partner — matching the quality of the product with the quality of the online presence.
- ◆ Serve five language markets natively (Arabic, English, French, Turkish, Polish) — not as an afterthought, but built into the foundation.
- ◆ Turn visitors into qualified leads through a direct Request-for-Quote flow, not just a static brochure site.
- ◆ Give the Castle Crops team full control — products, blog, certifications and contact details are editable without touching code.
- ◆ Extend the same brand identity into six social platforms, each used for what it does best.

Sitemap & Navigation

Products is the only dropdown — the rest are single-click destinations to keep the buyer journey short.

Home — The Funnel

- ◆ Hero with headline, lead copy and two calls to action: Request a Quote / Explore Products.
- ◆ Scrolling trust ticker reinforcing the three product pillars.
- ◆ Short previews of About and Our Farms, each linking to its full page.
- ◆ A spotlighted Featured Product above the general product grid.
- ◆ Certification badges (ISO / HACCP / Halal) linking to full detail on the About page.
- ◆ Latest blog articles and a closing contact call-to-action banner.

About — The Trust Story

- ◆ Full company story: mission, founding year, and a standout number once confirmed.
- ◆ Brand emblem presented in a framed, editorial layout.
- ◆ Full certifications section — issuing body, validity, and the certificate files themselves once available.
- ◆ This is where the homepage's certification badges send visitors for full detail.

Our Farms — Origin & Practice

- ◆ Photo and video gallery from the farms — one consolidated page rather than split across two.
- ◆ Sustainability story: hand-harvesting, natural growing conditions, zero harmful chemicals.
- ◆ Builds the credibility a wholesale buyer looks for before placing a large order.

Products — The Catalogue

- ◆ One page, three anchored sections — Wadi Dates, Olives, Extra Virgin Olive Oil.
- ◆ The nav dropdown jumps straight to the relevant section.
- ◆ Each product ends with a direct Request-a-Quote link, pre-filling the product field on Contact.

Blog — Industry & Company News

- ◆ Clickable article cards — image, title, date, short excerpt.
- ◆ Fully editable from the admin panel — add, edit, or remove posts without a developer.
- ◆ Dates format automatically per visitor language (day/month/year order changes correctly per locale).

Contact — The Conversion Point

- ◆ Full RFQ form: name, company, phone, email, product, quantity, message.
- ◆ Instant WhatsApp click-to-chat card alongside the form.
- ◆ Real embedded map once the address is confirmed.
- ◆ Social media links repeated here alongside phone, email, and branch numbers.

BUILT IN FROM DAY ONE

Five Languages, One Site

Arabic

Source language, right-to-left layout

English

Source language

French

AI-drafted, native review recommended

Turkish

AI-drafted, native review recommended

Polish

AI-drafted, native review recommended

- ◆ Browser language is detected automatically on first visit; the chosen language is then remembered for return visits.
- ◆ A language switcher sits in the header at all times — Arabic is the only layout that mirrors to right-to-left.
- ◆ Every page's title, description, and social-share preview (SEO metadata) is translated per language, not just the visible page text.

Admin Panel — What You Can Edit

- ◆ Products — add, edit, remove, reorder, mark one as Featured
- ◆ Blog posts — write, publish, or take down articles
- ◆ Certifications — upload certificate images once available
- ◆ Company stats — founding year, standout figures
- ◆ Contact info — branch phone numbers, official email, map location
- ◆ Trust badges & RFQ inbox — see every quote request as it comes in

No developer needed for day-to-day content updates.

Social Media — Platform Roles

Platform	Primary Role	Audience
LinkedIn	B2B credibility — export deals, certifications, trade shows	Wholesale buyers, distributors
Facebook	Local community presence, offers, store updates	Local retail customers
Instagram	Brand lifestyle — product beauty shots, farm stories	Consumers, retail buyers
TikTok	Short farm-to-table video, behind-the-scenes harvest	Younger consumer audience
X	Company news, quick announcements	Industry followers, press
YouTube	Longer farm and process videos, embeddable on the site	All audiences, site visitors

Content Pillars & Frequency

Product Spotlights	Farm & Harvest Stories	Export & Trade Milestones	Customer / Partner Trust
2x / week Dates, olives, olive oil — quality, packaging, sourcing	1-2x / week Behind-the-scenes, sustainability, hand-harvest process	As they happen New markets, certifications, trade show appearances	1x / week Wholesale relationships, testimonials, use cases

Posting cadence is a starting point — we'll tune it against engagement after the first month live.

A Sample Week Across Platforms

Sun	Mon	Tue	Wed	Thu	Fri	Sat
Instagram: product shot	LinkedIn: export milestone	TikTok: harvest clip	Facebook: local offer	Instagram: farm story	X: quick update	YouTube: weekly recap

- ◆ Every post carries the same gold-on-black visual identity as the website — consistent, recognizable, premium.
- ◆ Video content (TikTok, YouTube) draws from the same farm footage used on the Our Farms page.

HOW WE GET THERE

Project Timeline

READY WHEN YOU ARE

Next Steps

- ◆ Confirm this sitemap, page structure, and social media plan.
- ◆ Send over: founding year & standout number, branch phone numbers, official email, and business address for the map.
- ◆ Confirm product photography plan — existing photos, or a coordinated shoot.
- ◆ Once confirmed, development begins with Phase 1: CMS & database setup.
